

# Enterprise Application Development:

The most productive, reliable and scalable development tool in the industry

**UNIFACE**  
Advanced Development Technology

The ten ways  
We do it

# 1

## Productivity

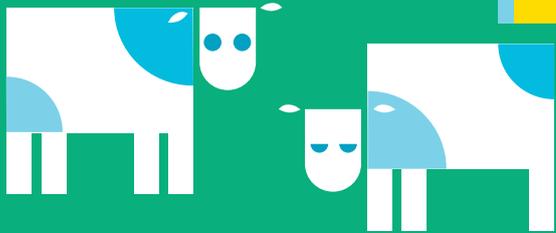

Achieve more with less, with one of the most productive enterprise application development tools in the industry

The unrivaled productivity that companies achieve with Uniface reduces the time to deploy business applications. With Uniface, developers are able to focus on user experience and business logic rather than coding, enabling them to build mission-critical applications faster than with other deployment platforms.

“I’d rather maintain 100 lines of Uniface code than 1,000 lines of other code to support the same functionality.”

**Hans Bloemendaal,**  
CRV, The Netherlands

# 2

## Reliability

Globally, businesses trust the proven reliability and performance of Uniface for their mission-critical applications

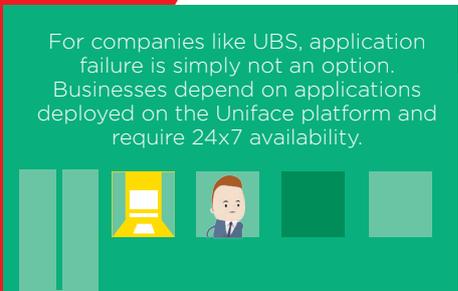

“Thanks to Uniface our mission-critical application has run reliably for the last 20 years.”

**Marion Koelzer,**  
UBS AG, Switzerland

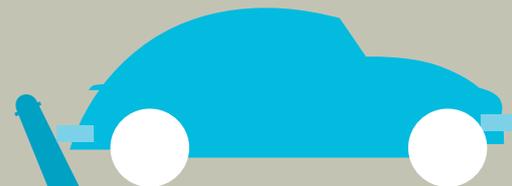

“It is clear that Uniface takes security very seriously. The Uniface platform ensures applications built through it are inherently protected and are therefore less prone to security threats.”

**Bola Rotibi,**  
Creative Intellect Consulting, UK

For companies like UBS, application failure is simply not an option. Businesses depend on applications deployed on the Uniface platform and require 24x7 availability.

# 3

## Security

Deploy secure applications with Uniface’s deployment architecture which safeguards mission-critical applications from the outset

Security is always a priority for Uniface, from taking proactive measures in the product, to providing knowledge and guidance to developers around secure coding practices. Uniface also collaborates with 3rd party security firms to conduct audits on deployment software.

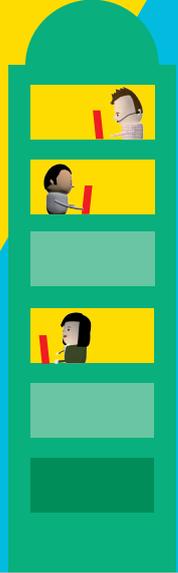

# 4

## Enterprise Scalability

Adapt quickly and effectively to growth and change with proven scalability trusted by enterprises around the globe

“Uniface enables Aurion’s mission-critical payroll application to pay over 300,000 employees every pay day.”

**Brian Coleman,**  
Aurion, Australia

Uniface applications effectively scale to meet new business requirements whether they’re for user growth, access to data or adding additional business functionality.

# 5 Application Longevity

Uniface apps are always upwards compatible with new versions enabling the move to new technologies, which can be achieved with minimum overhead or rework and without the need to re-code applications

“Our Uniface application continues to grow and facilitate the rapidly changing market trends of the connected world.”

**James Barker,**  
Carphone Warehouse, UK

Uniface gives the reassurance of maximum application ROI, with a proven track record of supporting new technology innovation, allowing customers to modernize their existing applications with new technologies.

# 6 Technology Independence

Develop platform-independent applications that work on all hardware platforms and operating environments

With powerful integration capabilities, no matter what the technology or information source, Uniface can consume and provide web services, call out to legacy applications developed in all technologies, or be called by them.

“Minnesota State Colleges and Universities’ integrated Uniface application is mission-critical to the educational experience of 350,000 students. The high productivity, low cost maintainability and ease of reuse has allowed a low budget government organization to have a top quality solution.”

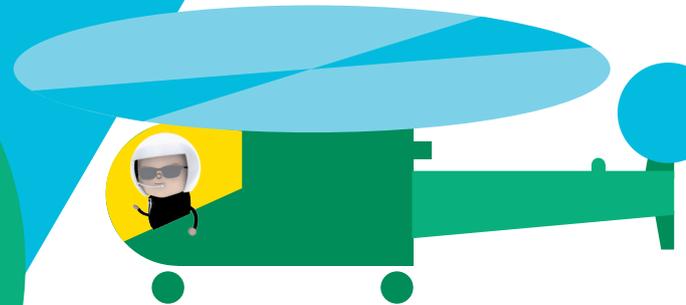

**Dave Willford,**  
Minnesota State Colleges  
& Universities, USA

“Uniface Professional Services helped us expand the user experience of our application through a thorough functional analysis and pragmatic enhancements and recommendations.”

**Seppo Karhunen,**  
CGI (Logica), Finland

The Uniface Delivery Group are experts combining extensive software knowledge with a business oriented mind-set. Uniface Professional Services know how to translate business problems into flexible, long-lasting and maintainable solutions covering the whole application development life-cycle.

# 7 Integration and Reuse

Reduce costs by reusing existing software assets in new or modernized applications

# 8 Collaboration for Results

Capitalize on the expertise, best practices and methodologies delivered by Uniface Professional Services

“With Uniface, we can take advantage of new technological advances without having to employ a bunch of technologists. Uniface takes care of that for us, so that we can focus on keeping our HR functionality ahead of the market.”

**Lawrence Knowles,  
MidlandHR, UK**

Uniface provides unparalleled flexibility in your choice of technology and can access data sources from multiple vendors, in multiple versions, on multiple systems and in multiple languages.

“We find the Uniface.info website very useful and are pleased that Uniface is committed to the continuing evolution of this community as a central place to share experiences and information.”

**Iain Sharp,  
PCI Systems Ltd., UK**

# 10 PartnersUnited Program

Reach business goals with a best-in-class partners program that drives a shared approach to business success

“For more than 15 years, we have enjoyed a close and stable relationship with the Uniface team. We’ve always been highly satisfied with their attentiveness and responsiveness to our needs.”

**Jean-Baptiste Feray,  
Proges-Plus, France**

# 9 User Community

Interact the way you prefer within the Uniface ecosystem, which provides a constant source of information to developers and business leaders

The Uniface community fosters communication and interaction between thousands of users across the globe through numerous virtual and physical events, Uniface.info (an online community forum), and the Uniface social media channels.

PartnersUnited is designed to help partners do more and sell more by extending their reach across markets and into high-growth areas while offering members a global network to uncover opportunities and find new growth avenues.

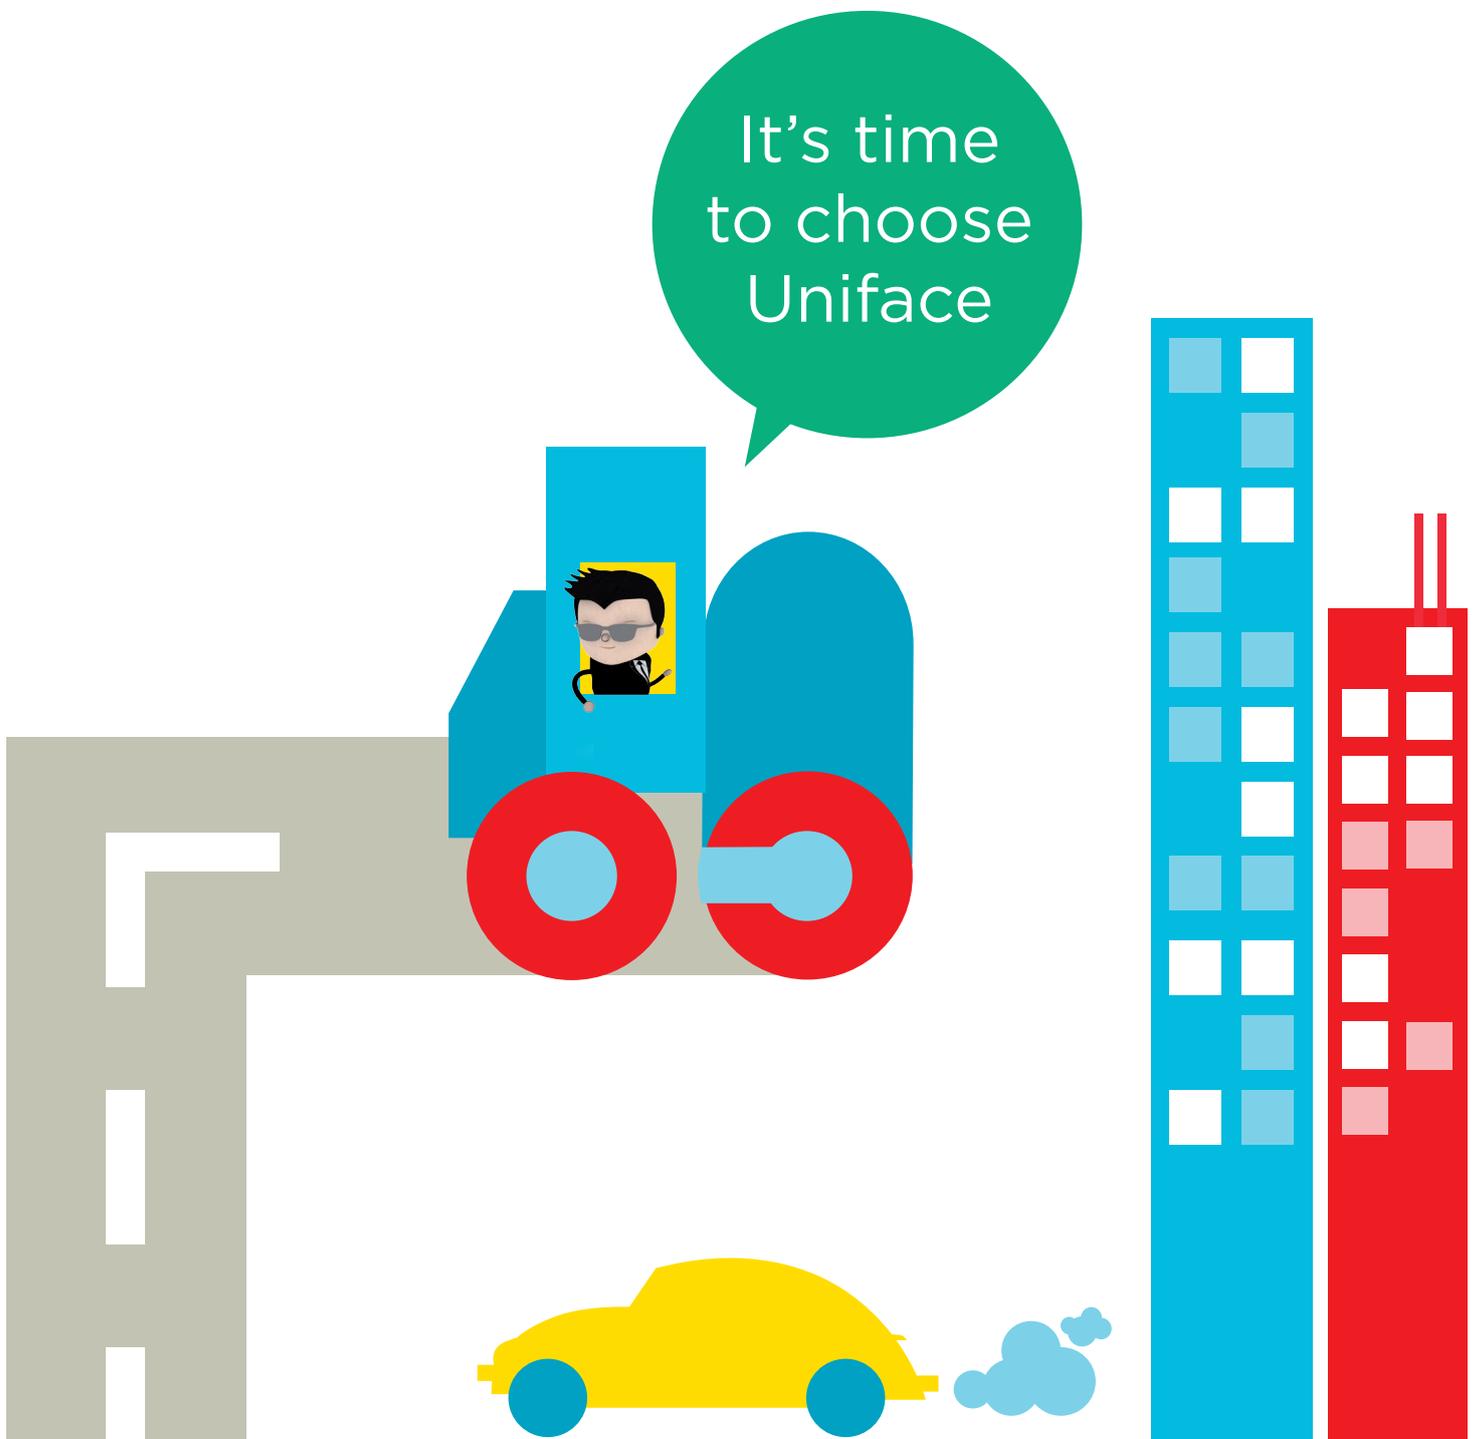

# UNIFACE

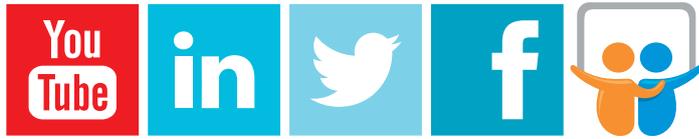

Advanced Development Technology

Uniface is a global software company that provides a highly productive development and deployment platform. Organizations worldwide choose Uniface to build mission-critical applications at a high abstraction level, realizing benefits such as productivity, reliability and scalability, not only during the development phase, but also once deployed. With continuous support for the latest technologies including mobile, web and cloud, Uniface customers are able to build once, deploy anywhere, enabling them to keep current of technology trends and innovations. Founded in 1984, Uniface is based in Amsterdam, The Netherlands with a global presence through local offices and distributor channels. Learn more at [www.uniface.com](http://www.uniface.com).

It's time  
to choose  
Uniface

“Application Modernization is an ongoing priority for QBE. From the days of a green screen application to the current browser-based implementation, Uniface has enabled us to keep current with new technologies and scale for expansion.”

**Lester Smith,**  
QBE, USA

“With Uniface we can consistently deliver successful projects that our business can depend on; it allows us to focus on actually building applications rather than simply crafting lots of code.”

**Frank van Dijk,**  
Holland Casino,  
The Netherlands

“The high productivity and ease of customization provided by Uniface enable us to remain a leader in the changeable robot business market.”

**Yasushi Kurosawa,**  
Kawasaki Heavy Industries,  
Japan
